**Linc is proud to announce .....**

**Racine, Wisconsin, March 2009** – CNH awarded Logistics Insight Corporation (LINC) a contract to provide supply chain and value added services to their Racine tractor and transmission plant. LINC will operate a Logistics Operations Center (LOC) adjacent to the plant that will meter and sequence material to meet demanding production schedules. A collaborative environment designed to achieve improvements in material flow, inventory accuracy, inventory reduction, warehouse flow and line side presentation will guide the way towards meeting World Class Manufacturing (WCM) standards and application of LEAN principles in the Racine plant.

**Goodfield, Illinois, June 2009** – CNH awarded contract to Logistics Insight Corporation (LINC) for finished goods inventory, kitting, releasing yard and shipping activities in support of their Goodfield, IL agriculture products facility. Operating within the current CNH facility, LINC will provide extensive systems applications to streamline the shipping process while maintaining flexibility for demand fluctuations.

**Grand Island, Nebraska, July 2009** – Logistics Insight Corporation (LINC) awarded a contract to provide multiple supply chain, warehouse, value added and logistics engineering services for the CNH Grand Island combine, windrower, header and hay tool manufacturing facility. Operating from a strategic warehouse location and within the plant, LINC will re-engineer the entire supply chain process for Grand Island from line side presentation and usage to PFEP, ASN and supplier shipment compliance. CNH and LINC will work jointly to achieve World Class Manufacturing (WCM) standards and in applying stringent LEAN principles.
